## Take the next step

Schedule an appointment with your Registered Investment Advisor for the personal, one-on-one assistance of an investment professional.

<sup>1</sup> If chosen, 100% allocation is required, and you cannot select other investment options. These options (also referred to as “pre-selected allocation options”) are not actively managed. The pre-selected allocation options are considered “static” because the portfolios and the percentages of contract value/purchase payments allocated to each portfolio within a pre-selected allocation option will not be changed by Protective. To maintain the target asset allocation, you can elect to have your investment rebalanced quarterly, semiannually, or annually. Please note that due to market returns and other factors, over time the pre-selected allocation options may no longer align with their original investment objective. Once you invest in a pre-selected allocation option, your investment will not be updated to reflect a revised or different pre-selected allocation option unless you submit new allocation instructions in writing. Consult your financial advisor for assistance in developing a portfolio specific to your needs and objectives before investing.

<sup>2</sup> Listed as “Pre-Selected Allocation Options” in the annuity application, these options offer automatic allocation to several pre-selected subaccounts within American Funds® Insurance Series (AFIS). These options consist of an allocation of funds for investors to consider and are not intended to be investment recommendations. They are hypothetical asset allocations designed for individuals with different time horizons and risk profiles. Allocations may not achieve investment objectives. Please talk to your financial professional for information on other investment alternatives that may be available to you. In making investment decisions, investors should consider their other assets, income and investments. The fund manager may change the construction of these allocation options, including the underlying AFIS subaccounts and/or percentage allocation to a given underlying subaccount, at any time. In response, Protective may choose to make the new or revised allocation options available to prospective investors by updating the option’s subaccount allocation details, as applicable, in the annuity application. If you are already invested in a pre-selected allocation option you may request your investment be updated to reflect a revised or different pre-selected allocation option by submitting new allocation instructions in writing.

<sup>3</sup> Protective offers asset allocation models (“Pre-Selected Allocation Option”) ranging from conservative to aggressive. The Pre-Selected Allocation Options offer automatic allocation to a pre-selected group of subaccounts and are intended to provide a diversified investment portfolio by combining different asset classes to help you reach your investment goal. While diversification may help reduce overall risk, it does not eliminate the risk of losses and it does not protect against losses in a declining market. There can be no assurance that any of the Pre-Selected Allocation Options will achieve their investment objectives. The composition of each specific Pre-Selected Allocation Option may change from time to time. Protective will provide written notice if the composition of a pre-selected allocation option changes. Please refer to the prospectus for more information.

**Variable annuities are sold by prospectus only. You can request a prospectus by calling 1-888-667-2145 (option 2). Before purchasing a variable annuity, you should carefully read the prospectus and consider the annuity’s investment objectives and all risks, charges, and expenses associated with the annuity and its investment options.**

Variable annuities are long-term investments intended for retirement planning and involve market risk and the possible loss of principal.

Certain Funds may have investment objectives and policies similar to other mutual funds (sometimes having similar names) that are managed by the same investment adviser or manager. The investment results of the Funds, however, may be more or less favorable than the results of such other mutual funds. Protective Life does not guarantee or make any representation that the investment results of any Fund is, or will be, comparable to any other mutual fund, even one with the same investment adviser or manager.

Investing outside the United States involves risk such as currency fluctuations, periods of illiquidity and price volatility. These risks may be heightened in connection with investments in developing countries. Small-company stocks entail additional risks, and they can fluctuate in price more than larger company stocks. The return of principal for bond portfolios and for portfolios with significant underlying bond holdings is not guaranteed. Investments are subject to the same interest rate, inflation and credit risks associated with the underlying bond holdings. Lower rated bonds are subject to greater fluctuations in value and risk of loss of income and principal than higher rated bonds. Fund shares of U.S. Government/AAA-Rated Securities Fund are not guaranteed by the U.S. government.

Protective® refers to Protective Life Insurance Company (PLICO), Nashville, TN. Variable annuities are distributed by Investment Distributors, Inc. (IDI), Birmingham, AL, a broker-dealer and the principal underwriter for registered products issued by PLICO. Product guarantees are backed by the financial strength and claims-paying ability of PLICO.
