Protect your retirement aspirations with the simplified diversification of pre-selected allocation portfolios

The allocation portfolios available with Schwab Genesis Advisory Variable Annuity are designed to provide diversification across asset classes and fund managers. The portfolios have varying levels of equity exposure to align with your investment objectives. Allocation portfolios are static allocations consisting of available investment options and are not actively managed. Your portfolio will be rebalanced to the target allocation at the frequency you select on your application (annually, semi-annually or quarterly).

This quarterly performance report is provided for your reference and assumes annual rebalancing of portfolio.

¹ Total return rates are displayed for the year-to-date (YTD) time period and annualized rates of return are displayed for time periods of 1-year and greater for each allocation portfolio available. Rates of return reflect only the current funds listed inside the portfolio and reflect annual rebalancing. Performance assumes an investment in the current allocation portfolio composition and does not reflect any previous changes to the portfolio composition, including the addition or removal of investment options.

² Non-standardized returns show the performance and fees of the underlying funds deductions for the mortality and expense risk charge (deducted daily as a percentage of daily sub-account net assets), and administrative charge (deducted daily as a percentage of daily sub-account net assets). The returns are calculated over the time period shown, regardless of whether the portfolio or any constituent fund was available as an investment option under the contract during that period. Performance predating inclusion in the product is hypothetical. Non-standardized returns do not reflect any optional benefits selected. Returns shown represent past performance and do not guarantee future results. Returns and values will fluctuate. The contract value may be worth more or less than the original investment and the actual returns may be lower or higher than the returns shown. For performance to the most recent month-end, visit your local Schwab branch or call 1-888-311-4889 (option 2).

¹ Total return rates are displayed for the year-to-date (YTD) time period and annualized rates of return are displayed for time periods of 1-year and greater for each allocation portfolio available. Rates of return reflect only the current funds listed inside the portfolio and reflect annual rebalancing. Performance assumes an investment in the current allocation portfolio composition and does not reflect any previous changes to the portfolio composition, including the addition or removal of investment options.

² The standardized returns reflect the deduction of all recurring fees and charges of the underlying funds and the variable contract. Variable contract fees and charges reflected in the standardized returns include the mortality and expense risk charge (deducted daily as a percentage of daily sub-account net assets) and administrative charge (deducted daily as a percentage of daily sub-account net assets). Charges for optional benefits are not reflected in the standardized returns. If these charges were reflected, the returns shown would be reduced. Standardized historical performance is limited to the date the funds were first available as an investment option under the contract, shown in the sub-account inception date column. "Since inception" returns are from the sub-account inception date through the end of the prior quarter. Returns shown represent past performance and do not guarantee future results. Returns and values will fluctuate. The contract value may be worth more or less than the original investment and the actual returns may be lower or higher than the returns shown. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost and current performance may be lower or higher than the performance data quoted. For performance to the most recent month-end, visit your local Schwab branch or call 1-888-311-4889 (option 2).

For investment performance for every subaccount, talk with a Schwab investment professional or call 1-888-311-4889 (option 2).

Variable annuities are sold by prospectus only. You can request a prospectus by calling 1-888-667-2145 (option 2). Before purchasing a variable annuity, you should carefully read the prospectus and consider the annuity's investment objectives and all risks, charges, and expenses associated with the annuity and its investment options.

These portfolios consist of an allocation of funds for investors to consider and are not intended to be investment recommendations. The portfolios are hypothetical asset allocations designed for individuals with different time horizons and risk profiles. Allocations may not achieve investment objectives. Please talk to your financial professional for information on other investment alternatives that may be available to you. In making investment decisions, investors should consider their other assets, income and investments.

Investing outside the United States involves risks such as currency fluctuations, periods of illiquidity and price volatility. These risks may be heightened in connection with investments in developing countries. Small-company stocks entail additional risks, and they can fluctuate in price more than larger company stocks. The return of principal for bond portfolios and for portfolios with significant underlying bond holdings is not guaranteed. Investments are subject to the same interest rate, inflation and credits risks associated with the underlying bond holdings. Lower rated bonds are subject to greater fluctuations in value and risk of loss of income and principal than higher rated bonds. Fund shares of U.S. Government/AAA-Rated Securities Fund are not guaranteed by the U.S. government.

Protective is not registered as an investment adviser and is not providing investment advice by making the Pre-Selected Allocation Options or the Allocation by Investment Category options available.

Variable annuities are long-term investments intended for retirement planning and involve market risk and the possible loss of principal. Investments in variable annuities are subject to fees and charges from the insurance company and the investment managers.

Withdrawals may be subject to income tax and, if taken prior to age 59½, an additional 10% IRS tax penalty may apply. More frequent withdrawals may reduce earnings more than annual withdrawals. During the withdrawal charge period, withdrawals in excess of the penalty-free amount may be subject to a withdrawal charge. Withdrawals reduce the annuity's remaining death benefit, contract value, cash surrender value and future earnings.

Schwab Genesis Advisory variable annuity is a flexible premium deferred variable and fixed annuity contract issued by PLICO in all states except New York under policy form series VDA-P-2006. SecurePay Life benefits provided by rider from number VDA-P-6057. Policy form numbers, product availability and product features may vary by state.
